THE EXHAUST

ECE/EG APPROVED MODES

Get started!

1. Start your engine. The Smart Valve will remain closed (Travel Mode).
2. A single touch of the switch located at the handlebar allows you to switch back and forward between the silent Travel Mode and the deep dark Performance Mode.
3. To engage Dynamic Mode, in which the valve is 50% opened, quickly tap the switch two times. A single touch of the switch will get you back to Travel Mode.
